### **Introduction**

Mathematics Training and Talent Search (MTTS) and PTMT programmes, funded by the National Board for Higher Mathematics, are organized under the aegis of MTTTS Trust. The MTTTS Programme has turned out to be very successful for more than two and a half decades and has motivated a large number of students to pursue a career in mathematics. We believe that a large number of students would benefit if we acquaint mathematics teachers with the methodology adopted in the MTTTS programme. PTMT attempts to familiarize mathematics teachers teaching at undergraduate and postgraduate levels with the methods followed in MTTTS programme. Faculty well-versed with MTTTS programme will share the pedagogy of teaching mathematics with participants.

### **Theme of the Programme**

The programme will concentrate on Group Theory. Abstract Algebra is one of the basic mathematics courses a student of mathematics encounters in an undergraduate programme. It requires imagination and subtle reasoning, and has a strong geometric flavour which needs to be transmitted to the students in a rigorous and clear manner. The objective of the programme is to train the teachers to teach algebra in an enjoyable and meaningful way.
