

Notification, SAIC, Tezpur University

It has been recently noticed that the functioning of two analytical instruments Shimadzu TGA-50 and Shimadzu DSC-60 Thermogravimetric analyzer under SAIC, Tezpur University are not reliable. The instruments may be useful for preliminary studies only however, for catering services to the users (internal or external), results provided by these instruments may not be accurate.

In view of the above, it has been decided not to consider sample analysis request from the users for these instruments from now onwards until further notification.
