

International collaboration on data gathering pertaining to SDGs

Tezpur University actively collaborates on Sustainable Development Goal (SDG) through international conferences focusing on data on various aspects of SDGs. One such notable event has been Sustainable Approaches in Food Engineering and Technology, SAFETy, organized in 2021 and 2022 with collaboration partners as (i) Sultan Qaboos University-Oman and (ii) University of Georgia, respectively.

These conferences provide platforms for sharing SDG-aligned data for academic purposes e.g., research, and innovations in sustainable food engineering, reinforcing Tezpur University's commitment to advancing sustainable development through academic and international collaboration.
