COURSE OVERVIEW

PRIOR ART SEARCH AND PATENT SPECIFICATION DRAFTING

Patents are the strongest form of intellectual property and has assumed much significance in India. Patent is both a legal and a technical document, considered as one of the important strategic assets of the Inventors and companies. The invention is described in words and pictures. The drafting of the patent claims require skill and precision in the language in claims is important to distinguish the present invention from what has already been invented. Prior art searches are essential prior to the filing of a patent application. A combination of technical knowledge and drafting skill is required to analyse the strengths and weaknesses of any invention, before proceeding with the IP Protection. While drafting patent specification, utmost importance with respect to the language and structure is required to identify the inventive concept underlying the inventor's embodiments and to capture them in the form of patent claims.

Transforming inventions into well-crafted patent applications requires a combination of knowledge and skills that can only be acquired through a comprehensive hands-on experience. Learning from experienced patent practitioners, this course will enhance your patent drafting skills and secure the best available protection for your or your client's inventions.
